- Well-versed in object-oriented practices like encapsulation, modularity, etc.
- Proficient in all 3 operating systems (Mac, Linux & Windows), as well as CLI.
- Experienced with group collaboration with Git

PROJECTS

Schedulr   *production time: 10 days*
Created an employee-scheduling application in Rails and Javascript. Managers create a schedule and drag-and-drop employees to fill shifts.

CLYWmparison   *production time: 48 hours*
A data visualization tool to showcase the differences between yoyo models. Built with Javascript and D3 graphing library, over the course of a weekend.

Seat Yourself   *production time: 5 days*
Created a restaurant-reservation system with Rails and Javascript. Features Google Maps restaurant location through their API and an availability-checking algorithm.
